Description: The demise of fixed exchange rates initiated a rapid rise in the level of foreign exchange trading, otherwise known as Forex. The primary purpose of the foreign exchange market is to assist international trade and investment, by converting one currency to another currency. In a typical foreign exchange transaction, a party purchases a quantity of one currency by paying a quantity of another currency. The modern foreign exchange market formed during the 1970s when countries gradually switched to floating exchange rates from the previous exchange rate regime.
